

## MS Sunrise – Steel Cutting Begun

Good news from the Sungdong Shipbuilding & Marine Engineering Co., Ltd. shipyard, South Korea: Steel cutting of the MS Sunrise began in mid-June 2010 with a small ceremony and some celebrations.

Building of the MS Sunrise, commissioned by Doric Zweite Navigation GmbH & Co. KG, is therefore on schedule. The project has now moved from the planning stages to the execution phase.

Thanks to the professionalism of the shipyard and to its top class modern facilities, we expect building of the MS Sunrise to progress well and delivery to take place on schedule.
